Diversity of Families (Grades K-5)

As children encounter different family structures, it's important to help them recognize and appreciate different family structures.

Before reading *My Two Homes*, introduce the idea that families can live in different homes and have a variety of family members. Share something you have learned from a family member—maybe a special pitch like Skye.

Family members can also have different opinions and viewpoints, and this [Brainpop video](#) gives some great ideas for kids to work through conflict with friends and family.
