Folktales, Frost, and FUN! (Grades K-5)

The folktale *Why Evergreens Keep Their Leaves* explains why evergreens stay green throughout the year.

If you live in an area with conifer trees, read the story then take a nature walk and look for different types of conifer trees. Take notes or photos of the cones or leaves, then visit this [tree finder](#) to learn more about conifers and what type of trees you found.

In the story, the Frost Queen tells Jack he can frost every other tree in the forest; with watercolors and salt, you can make your own [snowflakes](#) that look like Jack Frost visited!
